

ADVANCING INTERFACE TECHNOLOGIES

LEADERSHIP

CoActive's drive to succeed starts at the top. Our leadership team has crafted a culture of innovation and employee satisfaction, driven by an overwhelming desire to be the best at what we do.

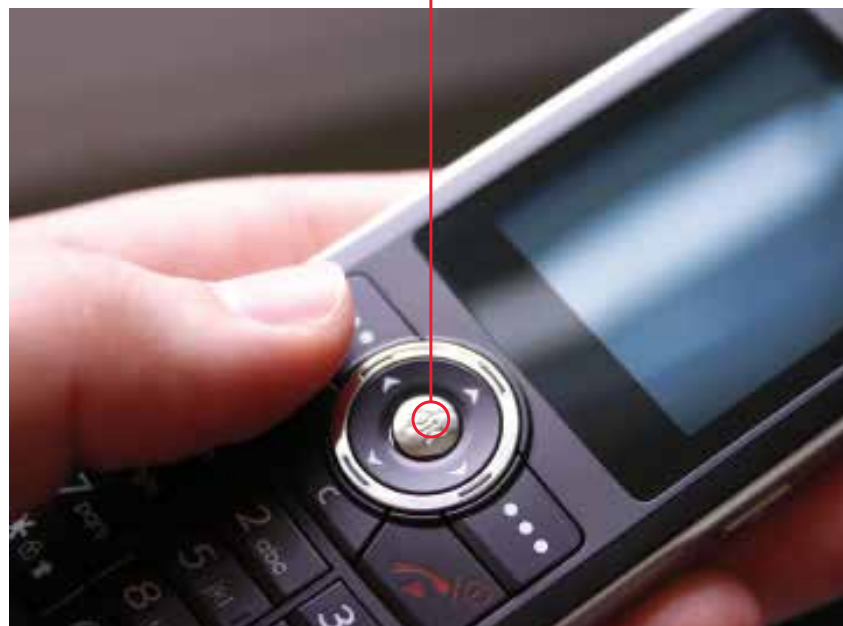

CAPABILITIES

Automotive, communications, security, appliances, industrial machinery—if it has a switch, CoActive has a solution. We have hundreds of products in our line and are always ready to partner with customers for a custom solution.

INNOVATION

CoActive never rests when it comes to developing "what's next." Our R&D ActionTeam is on the forefront of new sensor and touch screen technologies, we're transform the QWERTY keyboard, and building technologies based on haptic interfaces.

COACTIVE TECHNOLOGIES CONCURRENT ENGINEERING, MANUFACTURING + PROJECT MANAGEMENT

COMPREHENSIVE. GLOBAL. RESPONSIVE.

What does CoActive Technologies mean to you?

It means a unique company with the right resources and capabilities to be a key supplier in your supply chain. CoActive Technologies is one of the leading global manufacturers and suppliers of interface switches, controls and modules to the world's largest markets and emerging applications. Backed by Littlejohn LLC, an eight billion dollar private equity company, and with 2007 revenues in excess of \$300 million, CoActive Technologies has the financial strength, engineering resources, and global manufacturing presence to provide leading edge interface solutions for next generation designs in the handset, consumer electronics, computer, communications, automotive, off-road and other diverse markets.

Comprised of three operating divisions, CoActive Technologies' products include the broadest range of standard and custom switches, keypads, dome arrays, modules, joystick controls, smart card and high reliability interconnect devices.

With 12 fully integrated manufacturing centers, three engineering design centers and global sales and service centers on three continents, CoActive Technologies is uniquely positioned and empowered to design and deliver the best interface solution for your next product design.

CoActive Technologies means some of the most recognized product brands in the industry: C&K Components, DeltaTec Controls and CoActive KDM. Built and empowered to respond quickly to industry needs, these three divisions enable CoActive Technologies to combine design innovations to produce next generation interface control solutions...fast. No other company can provide this comprehensive product offering, global presence, manufacturing capability and level of customer service.

C&K Components is the leader in the design and manufacturing of standard and custom miniature, subminiature, micro miniature and ultra miniature switches and assemblies. With the world's smallest micro miniature tactile switch and with zero ppm defect manufacturing capability on all automotive grade products, C&K's state-of-the-art, design and highly automated manufacturing centers in Europe, North America and Asia, are capable and qualified to participate in your next design program.

DeltaTec Controls is a pioneer in interface control technology, providing panel assemblies, joystick controls, rocker switches, switch assemblies and control systems to a variety of end markets including off-road, industrial and automotive applications. DeltaTec leverages its global presence and highly experienced engineering team, to help OEMs make a seamless transition from hydraulics to electronic controls.

CoActive KDM is a key supplier of keypads, dome arrays, modules, lenses, plastic moldings, and illumination solutions for all types of portable electronic devices. CoActive KDM's advanced tooling and assembly processes combined with its extensive number of available materials and technologies make it uniquely qualified to solve any application-specific requirement.
